ARLINGTON SPRING 22

UTA SPRING BREAK TESTING

Spring break is a time for college students to relax, socialize, and for some of us, do some serious race car testing. From March 16–20th, the team was graciously hosted by the University of Texas at Arlington's FSAE team. The team spent time working on various data collection and validation with the 2021 car for one last time. During this trip, the team not only worked on the car and gained valuable knowledge from the testing, but also had ample opportunity to enjoy Dallas and have a great time. From karting to attending an IndyCar race, the team was fortunate enough to find a balance between working and having fun this spring break. We look forward to making the drive back to Arlington again!

Pit Stops for Hope

Manufacturing Update

Upcoming Dates

PIT STOPS FOR HOPE

A fundamental principle of TigerRacing is the honor of giving back to the community. The team has various volunteering events scheduled throughout the year, but one specifically that is new to us is a partnership with Pit Stops for Hope. Pit Stops for Hope is an LSU alumni-owned nonprofit organization that uses resources, and partners such as TigerRacing, to bring awareness to STEAM education in our communities. TigerRacing is proud to announce that the team has volunteered to partake in STEAM expos for Denham Springs Middle School and Central High School. The team brought out our 2017 car and spent the day with young adults interested in a career in STEAM. These are not the only events the team has planned with schools for the year, and we are always looking forward to being able to give back to the community!

MANUFACTURING UPDATE

As the team nears competition, the final push to complete the car begins. The team is spending every day working on getting the 22 car out in time for competition, and we are currently making good progress on meeting our required deadlines. The team has a complete detailed timeline on what needs to be done, and if you would like to know more about it, please reach out to any of our contacts, and we would be more than happy to fill you in on anything you would like to know. As subsystems finish up manufacturing and troubleshooting, we will be putting the car together. Once completed, we will be getting as much testing done before competition. As always, Geaux Faster!

UPCOMING DATES

- Destination LSU April 9th & 23rd
- FSAE Michigan competition May 18th-21st
- 2022 Pitt Shootout July 9th
